

Clark Forklift Parts

Clark Forklift Parts - Currently, there are no less than 350,000 Clark forklifts performing worldwide, and upwards of 250,000 in use in North America alone. With five main lines across the world, Clark is proud to be one of the most expansive corporations in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, dual fuel, gasoline, LPG, hand-driven trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift, handles more than 120,000 specialized parts built for 20 unique brands of forklifts and automated equipment. Your regional Clark Seller is your complete source for availability of all your parts requirements supplied by Clark Totalift.

Clark's extraordinary Parts Distribution Facilities are conveniently located in Louisville, Kentucky, which serves both their clients and dealers in North America, and Changwon, South Korea, which handles their Asian dealers and customers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing manufacturers. Motivated to supply the highest level of value and service to our users, Clark remains on the leading edge when it comes to enhancing output and benefiting performance.

Clark Totalift has a really outstanding international support network. With over 550 locations worldwide, supplier representation in over 80 countries and 230 locations in North America, their high level of dedication to their clients predominates the material handling market.

By pioneering the operator restraint system safety feature, Clark proudly remains a leader of refinement in the industrial equipment and automated forklift industry. This exceptional dedication to safety is now a standard feature on every forklift.

Clark's continual goal to have the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 - Clark, is the first forklift manufacturer across the world to be certified with the globally approved quality standard ISO 9001 for every one of their production facilities. Also, the ISO 14001 Environmental Management System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement allows Clark to be ready for any environmental limitations, thus placing them in a dominant industry position.

Clark has selected the structure of "Lean Manufacturing" at all of its assembly facilities because this technique is particularly economical and permits minimal use of resources. Developed to ensure maximum efficiency, this system is intended to discover and acknowledge the most effective methods for production plant stewardship. Clark has completed this transition of its Korean facility. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and manufacturing efficiencies.

By working collectively, Clark's product suppliers and engineers communicate towards enhancing product efficiency while minimizing expenses. The contemporary value engineering agenda combines modern product development and provides improved client support and service within the industry.
